324	What is claimed is:	
325	[Claim 1]	A packer, comprising a sensor positioned therein.
1		
1	[Claim 2]	The packer of claim 1, wherein the sensor is a MEMS
2	sensor.	
1		
1	[Claim 3]	The packer of claim 1, wherein the sensor is a
2	nanotechnology-based sensor.	
1		
1		The packer of claim 1, wherein the sensor comprises a
2	pressure g a	uge.
1		
1	[Claim 5]	,
2	to measure	a characteristic within the packer.
1		
1	[Claim 6]	The packer of claim 5, wherein the characteristic is a
2	pressure.	
1		
1	[Claim 7]	The packer of claim 1, further comprising:
2	a setting chamber; and	
3 4	the sensor i	s adapted to measure a pressure within a setting
1	chamber.	
1	[Claim 8]	The packer of claim 7, further comprising a second
2		oted to measure a characteristic external to the packer.

[Claim 9] The packer of claim 1, wherein the sensor is adapted 1 to measure a characteristic external to the packer. 2 1 [Claim 10] The packer of claim 9, wherein the sensor is adapted 1 2 to measure a well annulus pressure. 1 1 [Claim 11] The packer of claim 1, wherein the sensor is adapted to measure a tubing pressure. 2 1 [Claim 12] A completion, comprising: 1 2 a packer having a setting chamber: 3 a pressure gauge adapted to measure a pressure within the setting 4 chamber. 1 1 [Claim 13] The completion of claim 12, wherein the pressure 2 gauge measures the direct pressure of the setting chamber. 1 [Claim 14] The completion of claim 12, wherein the pressure 1 2 gauge is directly ported to the setting chamber. 1 [Claim 15] The completion of claim 12, wherein the pressure 1 2 gauge is positioned within the setting chamber. 1 [Claim 16] The completion of claim 12, wherein the pressure 1 2 gauge is positioned above the packer in a well.

1

```
[Claim 17] The completion of claim 12, wherein the pressure
1
    gauge is adapted to measure a tubing pressure in an interior central
2
3
     passageway of the packer via the setting chamber.
1
1
    [Claim 18] A completion, comprising:
2
    a packer:
3
    a gauge above the packer;
4
    the gauge communicating with an interior cavity of the packer.
1
    [Claim 19] The completion of claim 18, wherein the gauge is
1
2
    directly connected to the packer.
1
    [Claim 20] The completion of claim 18, wherein the gauge is
1
2
     positioned within the interior cavity of the packer.
1
1
    [Claim 21] A method for use in a well, comprising directly
2
    measuring a pressure in a setting chamber of a downhole tool with
3
    a pressure gauge.
1
1
    [Claim 22] The method of claim 21, further comprising measuring
2
    a tubing pressure with the pressure gauge.
1
    [Claim 23] A method for use in a well, comprising:
1
2
     positioning a plurality of gauges within a packer;
3
     measuring well characteristics at different positions within the well
4
     using the gauges.
1
```

[Claim 24] The method of claim 23, further comprising measuring
 a tubing pressure with one of the gauges.
 [Claim 25] The method of claim 23, further comprising measuring

[Claim 25] The method of claim 23, further comprising measuring an annulus pressure with one of the gauges.

2

1

[Claim 26] The method of claim 23, further comprising measuring a setting chamber pressure within the packer with one of the gauges.
